İstanbul

2022

EXPERIENCE

DAIKIN TURKEY

İstanbul

Business Analyst

Nov 2024 – Present

- Coordinating requirements and deliverables across business units, IT teams, and external stakeholders
- Identifying business needs and translating them into technical specifications while considering system constraints
- Preparing user stories, process flows, mock-ups, and functional documentation to support development teams
- Designing and coordinating user acceptance testing (UAT) and system testing processes
- Supporting cross-functional projects and managing delivery in line with Agile methodologies
- Performing SQL-based data analysis to validate business logic and support reporting requirements
- Contributing to process governance and ensuring alignment with enterprise IT standards

VALENS RESEARCH

Cambridge, MA (Remote)

Business Systems Analyst

Oct 2021 – Aug 2025

- Led end-to-end business analysis activities across multiple financial and operational system implementations
- Translated business requirements into technical solutions including APIs, integrations, and data workflows
- Designed system architectures and customer-facing applications supporting digital workflows and user journeys
- Created detailed documentation including user stories, UML diagrams, flow diagrams, and acceptance criteria
- Worked with Agile teams using Jira and Confluence to manage backlog, sprint planning, and delivery tracking
- Supported system testing, UAT, and release processes to ensure high-quality software delivery
